

Product Requirements Document (PRD)

Product: Custom Dollar Note Personalization Platform

1. Overview

1.1 Product Summary

A web-based platform where users can upload their photo and generate a personalized “dollar-style souvenir note” with custom text, templates, and design elements. Users can preview, customize, pay, and download a high-resolution digital image (and optionally order prints).

Note: The product is a novelty/gift service and must clearly avoid imitation of legal currency.

1.2 Problem Statement

People want personalized, creative digital gifts for:

- Birthdays
- Weddings
- Friendships
- Social media sharing

But existing tools are either:

- Too complex (design tools like Photoshop)
- Not personalized enough (generic templates)

1.3 Goal

Build a simple, automated, and scalable platform for creating personalized “money-style” digital souvenirs.

2. Objectives

- Enable users to generate custom notes in under 2 minutes
 - Provide real-time visual editing
 - Automate image processing and rendering
 - Monetize via per-download payments and subscriptions
 - Ensure legal compliance for novelty design usage
-

3. Target Audience

Primary Users

- Gen Z users (16–30)
- Social media users
- Gift buyers

Secondary Users

- Event planners
 - Small businesses
 - Print shops
-

4. Core Features

4.1 User Features

1. Authentication

- Email login
- Google login
- Guest preview mode (limited)

2. Template Selection

- Classic dollar-style template (non-realistic)
- Gold luxury template
- Birthday edition
- Wedding edition
- Meme/funny edition

3. Image Upload

- JPG, PNG, WEBP support
- Max size: 10MB
- Auto face detection (optional)

4. Editor (Live Preview)

- Drag & drop image
- Resize image
- Rotate image
- Text editing (name, message, title)

- Font selection
- Color customization

5. Preview Mode

- Watermarked preview
- Low-resolution rendering

6. Payment System

- Stripe integration
- PayPal support
- Local payment (JazzCash/Easypaisa optional)

7. Output Generation

- High-resolution PNG (300 DPI)
- PDF export (print-ready)
- Optional print ordering

8. Download System

- Secure download link
 - Expiry-based download access
-

4.2 Admin Features

- Manage templates
 - View orders
 - Manage users
 - Track revenue
 - Monitor abuse/fraud attempts
-

5. User Flow

Step 1: Landing Page

User sees:

- Product demo
- Examples
- CTA: "Create Your Note"

Step 2: Template Selection

User chooses design

Step 3: Upload Photo

User uploads image

Step 4: Edit Design

- Position image
- Add text
- Customize style

Step 5: Preview

- Watermarked preview shown

Step 6: Payment

User selects plan and pays

Step 7: Generation

System generates final file

Step 8: Download

User downloads final design

6. System Architecture

6.1 Frontend

- Next.js
- Tailwind CSS
- Fabric.js / Canvas API for editor

6.2 Backend

- FastAPI (Python) OR Node.js (NestJS)
- REST APIs

6.3 Database

- PostgreSQL

Tables:

- users
- orders
- templates
- payments
- designs

6.4 Storage

- AWS S3 / Cloudflare R2
- Stores:
 - User images
 - Generated files

6.5 Image Processing

- Pillow (Python)
- Sharp (Node.js)
- Background removal API (optional)

7. System Architecture Flow

User Upload → API Server → Image Processor → Canvas Renderer → Storage → Payment Check → Final Output

8. Monetization Model

8.1 Pay-per-download

- Basic: \$1 (PNG only)
- Premium: \$3 (PNG + PDF)
- Pro: \$5 (HD + print-ready)

8.2 Subscription

- \$9/month
- Unlimited generations

8.3 B2B Model

- Event companies
 - Gift shops
 - Bulk customization API
-

9. Non-Functional Requirements

- Fast rendering (<3 seconds preview)
 - Secure file storage
 - Scalable architecture
 - Mobile responsive
 - GDPR/privacy compliance
-

10. Legal & Compliance

- Must NOT replicate real currency exactly
 - Must include "Novelty / Not Legal Tender" watermark
 - Must avoid misleading design similarity
 - User terms must clearly state:
 - For entertainment/gift use only
 - No financial/legal representation
-

11. MVP Scope (Phase 1)

Must include:

- 5 templates
 - Upload image
 - Drag & resize editor
 - Text customization
 - Watermarked preview
 - Payment integration
 - Download system
-

12. Future Enhancements

- AI face enhancement

- AI design suggestions
 - Social sharing templates
 - Print-on-demand integration
 - Mobile app (Flutter)
 - NFT-style collectible notes
-

13. Risks

- Legal misunderstanding of currency design
 - Payment gateway restrictions
 - Image processing performance load
 - Abuse of image upload system
-

14. Success Metrics

- Conversion rate > 5%
 - Avg creation time < 2 minutes
 - Repeat users > 30%
 - Monthly revenue growth
-

15. Conclusion

This platform combines personalization, gifting, and digital creativity into a scalable micro-SaaS product. The MVP can be launched quickly and validated in the market before scaling advanced features like AI and print services.
